

It is my understanding the FCC is proposing to expand Low Power FM service which may allow new LPFM stations to take priority over current FM translator service. I do NOT want this to happen as the station I listen to - K-LOVE - is a translator station in my area (91.3 and 90.3; Pocatello, Idaho Falls, Blackfoot).

This station is very important as it brings a positive alternative to my listening area. It is family oriented, encouraging, and refreshing, and is the ONLY station I will listen to. I believe replacing this station with something else would have a negative and drastic effect on my local community. I believe the service provided by K-LOVE is in the public interest because it provides a positive, family oriented approach. Anything less than this is always a detriment to any community.

Thank you for your time, and please do NOT replace translator stations with the Low Power FM service.

Thank you.
